Course Syllabus of Three month Add on certificate course on "LED bulb repairing technician" Total Credit: 9

Unit	Element	Topic	Credit
1.	Basics of Electronics and LED	Differentiate between various electronic and electrical components, materials and their specific properties, types and usages.     Differentiate between alternating current (AC) and direct current (DC).     Identify the types of solder and flux List the function of the different.     Components of a soldering iron. Identify the selection criteria of a suitable tip.     Demonstrate the LED working principle List the parameters which affect the overall life of LED.     Categorise LED into its various types such as indicator, illuminator and Chip on Board (COB).     List the advantages of LED light products.     List the basic parameters of LEDs and their importance in an LED products.     Distinguish between the different types of power sources used in LED lighting and their characteristics.	3
2.	LED Luminary Repair and Assembly	List the major components of an LED luminary such as LED light engine, LED Driver, LED heat sink and thermal pads.     Identify the tools required for LED product assembly.     List the materials used in LED product assembly.     Demonstrate basic knowledge of assembly of products such as spot light, LED bulb and LED tube light.	2

The department of Philosophy of J.K.M. organized a one day workshop on 'Logical Reasoning' on 24th September, 2022. With due permission of our respected Principal Sir, we invited Dr. Snigdha Bora Neog, Assistant professor, department of philosophy of D.C.B. girls college as a resource person. Resource person Dr. Snigdha Bora Neog nicely demonstrated different topics of logical reasoning, such as Venn Diagram , Blood Relation, Deductive Reasoning, Cause & Effect, Direction sense etc. All the students actively present and highly benefited through this workshop.
